

数学与系统科学研究院  
计算数学所博士后定期学术报告

报告人: **Dr. Guohan Zhang**

( *Institute of Computational Mathematics and Scientific/Engineering Computing, CAS* )

报告题目:

**Some new results in Extended  
Lorentz cones**

报告时间: **2018 年 11 月 7 日 (周三)**

**下午 16:00-17:00**

报告地点: **科技综合楼三层  
311 报告厅**

## **Abstract:**

**Extended Lorentz cones are first defined by Nemeth and Zhang on 2015. Meanwhile, that article also showed some properties of extended Lorentz cones and its relation to some complementarity problems. After that, many articles investigated some interesting properties and applications in different points. This presentation will show this results and our new work about extended Lorentz cones.**
