报告题目：

Mathematical Optimization and Applications

邀请人： 优化与应用研究中心

报告时间：2019 年 4 月 13 日（周六）

下午 **15:00-16:00**

报告地点： 数学院南楼二层

219 教室

Abstract：

We present few recent mathematical optimization case studies driven by online, uncertain and massive data. We show how newly developed analytical decision models and numerical algorithms can be effectively used to achieve solution efficiency and optimality in many fields, including wireless communication, logistic operation, energy efficiency, medical imaging, etc.
