计算数学所学术报告

报告人: **Prof. Engui Fan**

(*Fudan University*)

报告题目:

**D bar method with applications to
1+1-dimensional integrable systems**

邀请人: 常向科 副研究员

报告时间: 2019 年 12 月 6 日 (周五)

晚上 20:00-21:00

报告地点: 数学院南楼二层

224 教室

Abstract:

In this talk, we first introduce short history of inverse scattering theory, then compare difference and connections among inverse scattering transformation, Riemann-Hilbert approach and \bar{d} method. At last, we provide some applications in 1+1-dimensional integrable systems
