报告题目:

SSOR methods for saddle point problem

邀请人: 白中治研究员

报告时间: 2008年4月4日(周五)

上午 10:30—11:30

报告地点: 科技综合楼三层 311

计算数学所报告厅

## Abstract:

**In this talk a SSOR-like method is presented for solving the saddle point problem. The convergence of this method is studied, and the spectral radius and the optimal relaxation parameter of the iteration matrix are investigated. Numerical experiments show that the SSOR method with a proper preconditioning matrix is better than SOR-like method presented by Golub et al.**
