(University of Florida USA)

报告题目:

**Recent advances in smooth
parametric surface construction**

邀请人: 徐国良研究员

报告时间: 2009年7月1日(周三)

下午 3:00—4:00

报告地点: 科技综合楼三层 311

计算数学所报告厅

Abstract:

The talk explains (1) two recently developed techniques for high-quality surface constructions: polar layout and the guided approach; and, time permitting, (2) it sketches how fast, lower-quality yet still smooth surface constructions on the GPU change main-stream graphics.
