报告题目:

Rare Events on the Manifold

邀请人: 周涛 博士

报告时间: 2015 年 6 月 26 日 (周五)

下午 14:30~15:30

报告地点: 数学院南楼二层

204 会议室

Abstract:

The rare event study is important in computational science. When the considered dynamics is subject to some internal constraints, the trajectory is on a manifold. We will investigate the rare event on the manifold and discuss the possible transition pattern when the dynamics is of nongradient type. This is a joint work with Xiang Zhou and Xiaoguang Li.
